The screenshot shows the Pipedream configuration interface for a YouTube (Data API) account. At the top, there's a 'CONFIGURE' button. Below it, the 'YouTube (Data API) Account' section is highlighted with a blue border. Inside this section, there's a red button labeled 'Connect a YouTube (Data API) account'. Below this button, a message states 'Credentials are encrypted. Revoke anytime.' The 'Title' field contains the placeholder '({steps.trigger.event.body.title})'. Below the title field is a 'Description' field. At the bottom of the configuration section is a 'Configure to test' button.
